2. (UC-01 to UC-06) Authentication and Profile creation

3. (UC-07 to UC-14) Study Partners and Group Collaboration

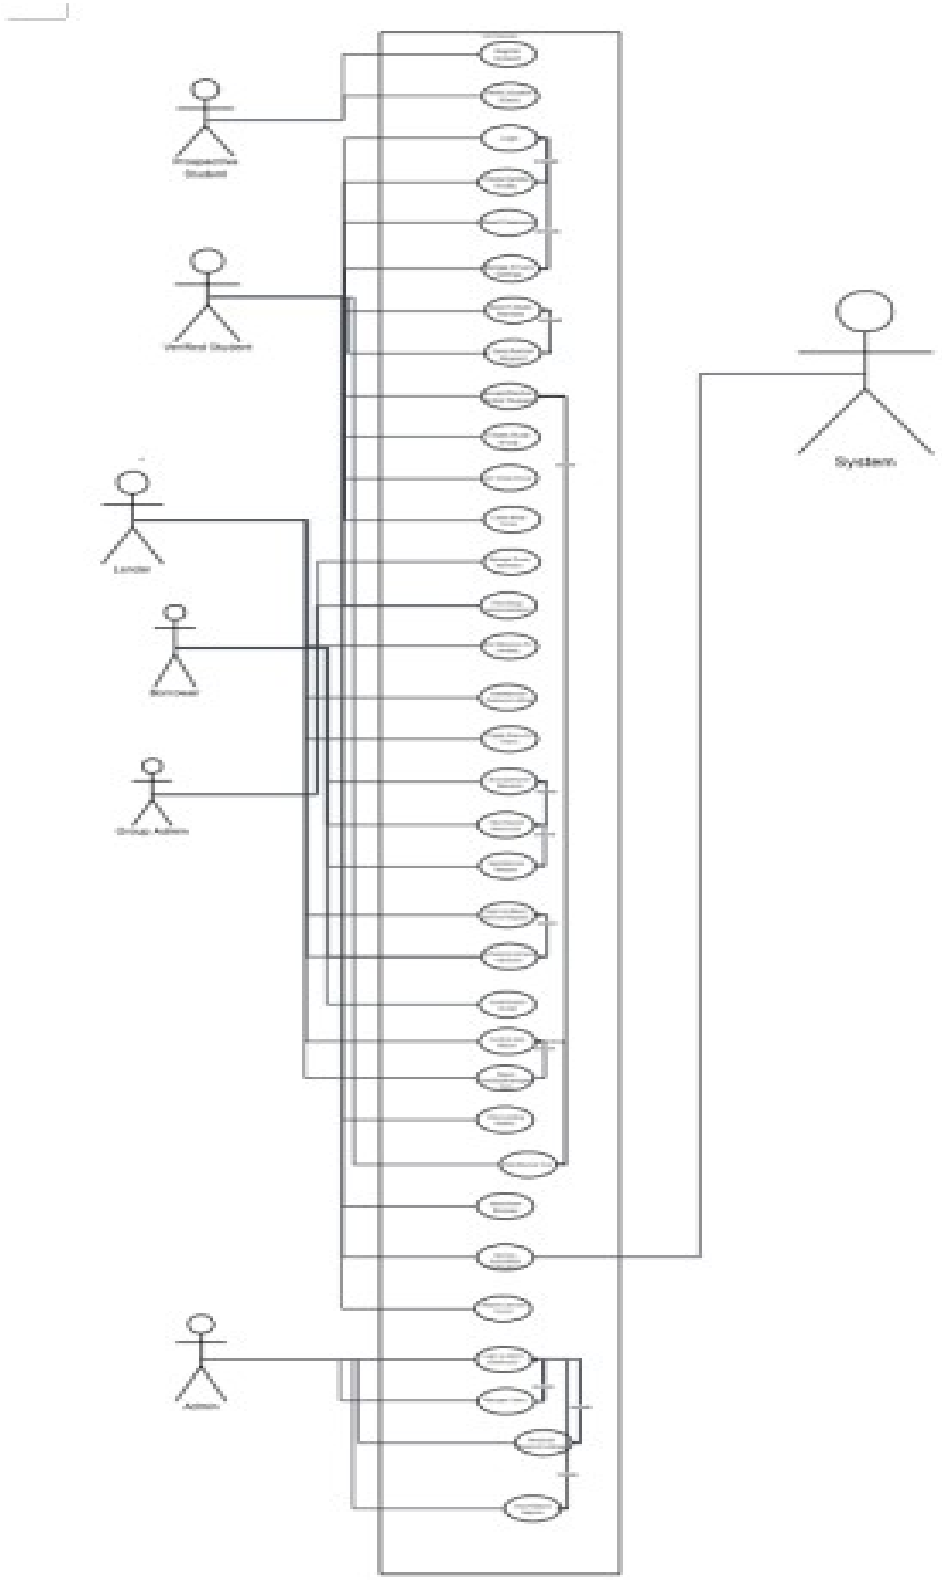
4. (UC-15 to UC-27) Resource Sharing (Lending & Borrowing)

5. (UC-28 to UC-30) Communication and extra Features

6. (UC-31 to UC-34) Administration (Admin Panel)

7. Analysis Class Diagram

Use Case Diagram (proper doc is also attached)



Authentication and Profile creation

Identifier	UC-01
Name	Register Account
Summary	Allows a prospective student to create an account using their mandatory **@lhr.nu.edu.pk** email address.
Priority	High
Actors	Prospective Student, System
Pre Conditions	Student has access to an active FAST university email address.
Post Conditions	A new, unverified user account is created with status "Pending Verification."
Typical course of Action	
Actor's Action	**System's Response**
1. Student selects "Sign Up" and enters their Name, FAST email (e.g., Person@lhr.nu.edu.pk), and desired password.	1. System validates the email format (must end in @lhr.nu.edu.pk) and password strength.
2. Student clicks "Register."	2. System creates the user account and sends a verification link/code to the provided email. 3. System displays a confirmation message, instructing the student to check their email.
Alternate course of Action	
Actor's Action	**System's Response**
1. Student enters an invalid email format (e.g., example@gmail.com).	1. System displays an error: "Invalid email format. Must use a valid @lhr.nu.edu.pk email."

Identifier	UC-02
Name	Verify Student Status
Summary	Student verifies their university status by clicking the unique link sent to their FAST email.
Priority	High
Actors	Prospective Student, System
Pre Conditions	Account has been created and has "Pending Verification" status.
Post Conditions	User account status is updated to "Verified."
Typical course of Action	
Actor's Action	**System's Response**
1. Student opens the verification email and clicks the unique verification link.	1. System confirms the validity of the verification token associated with the link.
	1.1 System updates the account status to "Verified" and redirects the student to the login page. 3. System displays a "Verification Successful" message.
Alternate course of Action	
Actor's Action	**System's Response**
1. Student clicks an expired or manually altered verification link.	1. System displays an error: "Verification link is invalid or has expired. Please request a new link."

Identifier	UC-03
Name	Login
Summary	Allows a verified student to access the platform.
Priority	High
Actors	Verified Student, System
Pre Conditions	User account is "Verified."
Post Conditions	Student is authenticated and redirected to the main dashboard.
Typical course of Action	
Actor's Action	**System's Response**
1. Student enters their registered email and password on the login page.	1. System checks credentials against the database.
2. Student clicks "Login."	2. System confirms the credentials are correct and account is verified. 3. System generates a session token and redirects the student to the dashboard.
Alternate course of Action	
Actor's Action	**System's Response**
1. Student enters an incorrect password.	1. System displays an error: "Invalid email or password." (Does not specify which is wrong for security).

Identifier	UC-04
Name	Create/Update Profile
Summary	Allows a student to complete their profile, including department and current semester information.
Priority	High
Actors	Verified Student, System
Pre Conditions	Student is logged in.
Post Conditions	Profile details are saved and available for partner/resource searching.
Typical course of Action	
Actor's Action	**System's Response**
1. Student navigates to the "Edit Profile" page.	1. System displays current profile data (if any).
2. Student inputs/updates their department (e.g., CS, EE), current semester (e.g., 5th), profile picture, and bio.	2. System validates input fields (e.g., semester is a number).
3. Student clicks "Save Changes."	3. System updates the database with the new profile information. 3.1. System confirms with a message: "Profile updated successfully."
Alternate course of Action	
Actor's Action	**System's Response**
1. Student tries to save the profile without selecting a department.	1. System displays an error: "Department is a required field."

Identifier	UC-05
Name	Reset Password
Summary	Allows a student to reset their password via their university email.
Priority	Medium
Actors	Student, System
Pre Conditions	Student remembers their university email.
Post Conditions	Password is changed, and the student can log in with the new password.
Typical course of Action	
Actor's Action	**System's Response**
1. Student clicks "Forgot Password" on the login page and enters their university email.	1. System validates the email exists in the database.
2. Student clicks "Send Reset Link."	2. System generates a unique, time-sensitive reset token and emails it to the student. 2.1 System confirms the email has been sent.
3. Student clicks the link in the email and enters a new password.	3. System validates the token and password strength. 3.1 System updates the password in the database and invalidates the token. 3.1 System confirms the password change and redirects to the login page.
Alternate course of Action	
Actor's Action	**System's Response**
1. Student enters an email that is not registered.	1. System displays a message: "Email not registered".

Identifier	UC-06
Name	Manage Privacy Settings
Summary	Allows a student to control the visibility of their profile information.
Priority	Medium
Actors	Verified Student, System
Pre Conditions	Student is logged in.
Post Conditions	Profile visibility settings are updated.
Typical course of Action	
Actor's Action	**System's Response**
1. Student navigates to "Privacy Settings."	1. System displays current settings (e.g., "Show Semester: ON," "Show Department: ON").
2. Student toggles options, such as hiding their current semester or department from non-partners.	2. System captures and updates the new settings.
3. Student clicks "Save."	3. System updates the privacy configuration in the database. 3.1 System confirms with "Settings saved."
Alternate course of Action	
Actor's Action	**System's Response**
1. Student clicks "Save" but the database connection fails.	1. System displays a message: "Error saving settings. Please try again."

Study Partners and Group Collaboration

Identifier	UC-07
Name	Search Study Partners
Summary	Student searches for potential study partners using academic filters such as department/semester
Priority	High
Actors	Student
Pre Conditions	Student is logged in and the account is verified
Post Conditions	Filtered list of matching students is shown where the student can send a request
Typical course of Action	
Actor's Action	**System's Response**
1. navigates to find study partners	1. displays filter options (department/semester/course)
2. chooses filters	2.validates selected filters
3. clicks "Search"	3.retrieves and displays profiles matching the criteria
Alternate course of Action	
Actor's Action	**System's Response**
1.applies filters that return no matches	1. Displays error message: "No students found with the selected criteria"
2.submits search without filters	2. Displays all the available verified students

Identifier	UC-08
Name	Send Partner Request
Summary	A student sends a formal request to another student to become study partners.
Priority	High
Actors	Verified Student, System
Pre Conditions	Both students are verified users. Sender is viewing the recipient's profile.
Post Conditions	A "Pending" partner request is recorded, and the recipient is notified.
Typical course of Action	
Actor's Action	**System's Response**
1. Student views a potential partner's profile.	1. System displays a "Send Partner Request" button.
2. Student clicks "Send Partner Request." (Optionally, adds a short message).	2. System validates that a request is not already pending or they are not already partners. 2.1. System records the request in the database. 2.2. System sends an in-app notification to the recipient. 2.3 System displays a confirmation: "Partner request sent
Alternate course of Action	
Actor's Action	**System's Response**
1. sends request to someone already requested	1.system displays: "Request already sent"
2. sends request to an existing partner	2.system displays message: "You are already partners"

Identifier	UC-09
Name	Accept/Decline Partner Request
Summary	A student manages incoming partner requests by accepting or declining them
Priority	High
Actors	Student
Pre Conditions	At least one pending partner request exists
Post Conditions	Accepted: both students are added to each other's partner list Denied: request is removed
Typical course of Action	
Actor's Action	**System's Response**
1. navigates to "Requests"	1.displays request list
2. selects "Accept"	2.system updates request status to "Accepted" and notifies the original sender
Alternate course of Action	
Actor's Action	**System's Response**
1.selects "Decline"	1.system marks request as declined

Identifier	UC-10
Name	Create Study Group
Summary	A student creates a new study group for a specific academic purpose
Priority	High
Actors	Student
Pre Conditions	Student is logged in
Post Conditions	A new study group is created
Typical course of Action	
Actor's Action	**System's Response**
clicks "Create Group"	displays group creation option
enters group details	validates the inputs
submits form	creates the study group
Alternate course of Action	
Actor's Action	**System's Response**
leaves required fields empty	displays validation message to fill in the blank fields

Identifier	UC-11
Name	Join Study Group
Summary	A student joins an existing study group
Priority	High
Actors	Student
Pre Conditions	Study group exists
Post Conditions	Student becomes a group member and gains access to the content
Typical course of Action	
Actor's Action	**System's Response**
views available groups	displays groups list
clicks "Join Group"	adds student to group member list after verification
Alternate course of Action	
Actor's Action	**System's Response**
requires admin approval	sends join request to group admin
group has reached maximum capacity	displays: "Group is full"

Identifier	UC-12
Name	Leave Study Group
Summary	A student leaves their existing study group
Priority	Medium
Actors	Student
Pre Conditions	Student is a member of the group
Post Conditions	Student is removed from the group
Typical course of Action	
Actor's Action	**System's Response**
clicks "Leave Group"	system asks for confirmation
confirms action	system removes student from group and updates student list
Alternate course of Action	
Actor's Action	**System's Response**
Group admin attempts to leave	Displays message: "Assign a new admin or delete the group"
Student cancels confirmation	keeps things unchanged

Identifier	UC-13
Name	Manage Group Members
Summary	Group admin manages group membership by removing members
Priority	Medium
Actors	Student (Group Admin)
Pre Conditions	Group admin exists
Post Conditions	Selected member is removed from group
Typical course of Action	
Actor's Action	**System's Response**
opens "Member List"	displays all group members
Admin selects "Remove"	system requests confirmation
Admin confirms action	removes member from the group
Alternate course of Action	
Actor's Action	**System's Response**
Non-admin attempts to access removal function	denies access and displays "Unauthorized action"

Identifier	UC-14
Name	Post Group Announcement
Summary	Allows a group admin to broadcast an important announcement to all group members.
Priority	Medium
Actors	Group Admin, System
Pre Conditions	Group Admin is logged in and viewing the group dashboard.
Post Conditions	The announcement is posted, and all members receive a notification.
Typical course of Action	
Actor's Action	**System's Response**
1. Group Admin selects "Post Announcement."	1. System presents a text input field for the announcement content.
2. Admin enters the announcement text (e.g., "Midterm study session tomorrow at Place").	2. System captures the content.
3. Admin clicks "Publish."	3. System records the announcement in the group's feed. 3.1. System sends an in-app notification to all active group members.
Alternate course of Action	
Actor's Action	**System's Response**
1. Admin enters an announcement exceeding the character limit (e.g., 500 characters).	1. System displays an error: "Announcement must be less than 500 characters."

Resource Sharing (Lending & Borrowing)

Identifier	UC-15
Name	Post Resource for Lending
Summary	Allows a student to list a physical item (book, notes, equipment) available for lending to other students.
Priority	High
Actors	Verified Student (Lender), System
Pre Conditions	Lender is logged in.
Post Conditions	A new resource listing is created with status "Available."
Typical course of Action	
Actor's Action	**System's Response**
1. Lender navigates to "Lend Resource" and selects the type (Book, Notes, Equipment).	1. System displays the appropriate form fields.
2. Lender inputs Title, Description, Course Code, Condition, and desired Loan Duration (e.g., 7 days).	2. System validates required fields are filled.
3. Lender uploads an image of the resource (optional).	3. System processes the image.
4. Lender clicks "Post Listing."	4.System creates the listing in the database. 6. System confirms: "Resource successfully listed."
Alternate course of Action	
Actor's Action	**System's Response**
1. Lender tries to post without a Title.	1. System displays an error: "Resource Title is required."

Identifier	UC-16
Name	Edit/Remove Resource Listing
Summary	Allows the lender to modify or delete their posted resource listing.
Priority	Medium
Actors	Verified Student (Lender), System
Pre Conditions	Lender has an active resource listing. The resource is not currently on loan.
Post Conditions	Listing is updated or deleted from the platform.
Typical course of Action	
Actor's Action	**System's Response**
1. Lender navigates to "My Listings" and selects a resource.	1. System displays the current listing details with "Edit" and "Remove" options.
2. Lender clicks "Edit," modifies the description, and clicks "Save."	2. System updates the listing details in the database. 3. System confirms: "Listing updated."
Alternate course of Action	
Actor's Action	**System's Response**
1. Lender clicks "Remove" and confirms the deletion.	1. System removes the listing from the database. 1.1. System confirms: "Listing removed."

Identifier	UC-17
Name	Toggle Resource Status
Summary	Allows a lender to temporarily pause a resource's availability without deleting the listing.
Priority	Low
Actors	Verified Student (Lender), System
Pre Conditions	Lender has an active resource listing.
Post Conditions	Resource status is toggled between "Available" and "Paused."
Typical course of Action	
Actor's Action	**System's Response**
1. Lender views their resource listing.	1. System displays a toggle switch for "Availability" (currently "Available").
2. Lender clicks the toggle to "Pause."	2. System changes the resource status to "Paused" (hidden from searches). 3. System confirms: "Listing paused. It will not appear in searches."
Alternate course of Action	
Actor's Action	**System's Response**
1. Lender clicks the toggle to "Resume."	1. System changes the resource status to "Available." 2. System confirms: "Listing is now live and searchable."

Identifier	UC-18
Name	Browse/Search Resources
Summary	Allows a student to find resources available for lending using filters like course, type, and condition.
Priority	High
Actors	Verified Student (Borrower), System
Pre Conditions	Student is logged in.
Post Conditions	Student is presented with a list of matching resources.
Typical course of Action	
Actor's Action	**System's Response**
1. Student navigates to "Resource Sharing."	1. System displays all "Available" resources and search filters.
2. Student enters a Course Code (e.g., CS201) and filters by "Book."	2. System queries listings matching the criteria.
3. Student clicks "Search."	3. System displays matching resource cards, including title, lender, and condition.
Alternate course of Action	
Actor's Action	**System's Response**
1. Student searches for a specific resource that is currently "Paused" or "On Loan."	1. System returns no results and displays: "No matching resources currently available for lending."

Identifier	UC-19
Name	View Shared Resources
Summary	Allows a student to view the full details of a specific resource listing.
Priority	High
Actors	Verified Student (Borrower), System
Pre Conditions	Student is viewing the resource search results.
Post Conditions	Full resource details and the "Send Borrow Request" option are displayed.
Typical course of Action	
Actor's Action	**System's Response**
1. Student clicks on a resource title from the search results.	1. System loads the detailed view for the resource. 1.1 System displays Title, Description, Lender details (Name, rating), Loan Duration, and resource Condition. 1.2 System displays the "Send Borrow Request" button.
Alternate course of Action	
Actor's Action	**System's Response**
1. Student clicks on the Lender's Name on the resource details page.	1. System navigates to the Lender's public profile page, showing their ratings and other active listings.

Identifier	UC-20
Name	Send Borrow Request
Summary	A student sends a request to the lender to borrow a specific item.
Priority	High
Actors	Verified Student (Borrower), System
Pre Conditions	Borrower is logged in and viewing an "Available" resource.
Post Conditions	A "Pending" borrow request is recorded, and the lender is notified.
Typical course of Action	
Actor's Action	**System's Response**
1. Student views the resource details.	1. System displays the "Send Borrow Request" button.
2. Student clicks the button and confirms the loan duration.	2. System records a pending request associated with the resource. 2.1. System notifies the lender of the new request. 2.2 System displays a confirmation: "Borrow request sent to Person.
Alternate course of Action	
Actor's Action	**System's Response**
1. Student clicks "Send Borrow Request," but the resource status was changed to "Paused" milliseconds earlier by the lender.	1. System displays an error: "This resource is no longer available for lending."

Identifier	UC-21
Name	Approve/Reject Borrow Request
Summary	Allows the lender to accept or deny a request to borrow their resource.
Priority	High
Actors	Verified Student (Lender), System
Pre Conditions	Lender has a pending incoming borrow request.
Post Conditions	The request is resolved, and the resource status is updated if approved.
Typical course of Action	
Actor's Action	**System's Response**
1. Lender navigates to "Incoming Requests" via a notification.	1. System lists pending requests, showing the borrower's Name and requested duration.
2. Lender reviews the request and clicks "Approve."	2. System updates the request status to "Approved." 3. System changes the resource status to "Awaiting Handover." 4. System sends a notification to the borrower, prompting them to schedule a handover (UC-22).
Alternate course of Action	
Actor's Action	**System's Response**
1. Lender clicks "Reject" and optionally provides a reason.	1. System updates the request status to "Rejected." 2. System sends a notification to the borrower.

Identifier	UC-22
Name	Schedule Campus Handover
Summary	The borrower or lender schedules a specific time and FAST campus location for the exchange of the resource.
Priority	High
Actors	Borrower or Lender, System
Pre Conditions	Borrow request has been "Approved" (Resource status is "Awaiting Handover").
Post Conditions	A handover event is scheduled, and both users are notified.
Typical course of Action	
Actor's Action	**System's Response**
1. Borrower receives the approval notification and clicks "Schedule Handover."	1. System presents a form for selecting a date (Date), time, and campus location (e.g., Cafeteria, Library, Place).
2. Borrower selects the details and clicks "Propose Handover."	2. System sends the proposal details to the lender. 3. System creates a provisional calendar event Calendar event for both parties.
3. Lender reviews the proposed time/place and clicks "Confirm Handover."	4. System finalizes the handover schedule. 5. System sends a final confirmation notification to both parties.
Alternate course of Action	
Actor's Action	**System's Response**
1. Lender clicks "Propose Alternative" and enters new details.	1. System sends the counter-proposal to the borrower for confirmation.

Identifier	UC-23
Name	Confirm Item Receipt
Summary	The borrower confirms they have physically received the item from the lender.
Priority	High
Actors	Borrower, System
Pre Conditions	Handover has been scheduled (UC-22).
Post Conditions	Resource status is updated to "On Loan." The loan period officially begins.
Typical course of Action	
Actor's Action	**System's Response**
1. After the physical exchange, the Borrower logs in and navigates to the loan details.	1. System displays a prominent "Confirm Receipt" button.
2. Borrower clicks "Confirm Receipt."	2. System updates the resource status to "On Loan." 2.1. System records the official Start Date (today) and calculated Return Date. 2.2. System notifies the Lender of the confirmation. 2.3. System displays confirmation: "Loan officially started."
Alternate course of Action	
Actor's Action	**System's Response**
1. Lender attempts to click the "Confirm Receipt" button.	1. System displays an error: "Only the Borrower can confirm receipt of the item."

Identifier	UC-24
Name	Confirm Item Return
Summary	The lender confirms they have physically received the item back from the borrower.
Priority	High
Actors	Lender, System
Pre Conditions	Resource status is "On Loan."
Post Conditions	Resource status is updated to "Available." The loan record is closed.
Typical course of Action	
Actor's Action	**System's Response**
1. After the physical return, the Lender navigates to the loan details.	1. System displays a prominent "Confirm Return" button.
2. Lender clicks "Confirm Return."	2. System updates the resource status to "Available." 2.1. System records the end date and closes the loan record. 2.2. System prompts the lender to rate the borrower (UC-27). 2.3. System displays confirmation: "Item successfully returned. Loan closed."
Alternate course of Action	
Actor's Action	**System's Response**
1. Lender confirms the return after the scheduled Return Date.	1. System logs the return as "Late." 2. System displays a warning/notification to the borrower about the late return.

Identifier	UC-25
Name	Report Overdue/Damaged Item
Summary	Allows a lender to formally report that a resource is overdue or was returned damaged.
Priority	High
Actors	Verified Student (Lender), System
Pre Conditions	Loan record is open (On Loan) or recently closed. Lender has received the item (or not).
Post Conditions	A dispute record is created, and the Admin is notified for moderation.
Typical course of Action	
Actor's Action	**System's Response**
1. Lender navigates to the loan details and clicks "Report Issue."	1. System presents options: "Overdue" or "Damaged."
2. Lender selects "Damaged" and provides a description and photos File of the damage.	2. System creates a dispute ticket, logs the details, and sets the status to "Pending Admin Review." 2.1. System sends a notification to the Borrower and the Admin. 2.2. System confirms: "Issue reported. Awaiting admin review."
Alternate course of Action	
Actor's Action	**System's Response**
1. Borrower reports a concern about item condition before return.	1. System creates an inquiry log for the Admin and Lender to view.

Identifier	UC-26
Name	View Lending History
Summary	Allows a student to view all past and current loan transactions (as a lender and borrower).
Priority	Medium
Actors	Verified Student, System
Pre Conditions	Student is logged in.
Post Conditions	Student is presented with a searchable, sortable list of loan records.
Typical course of Action	
Actor's Action	**System's Response**
1. Student navigates to "History."	1. System displays a list of past/current transactions, separated by "Lent Items" and "Borrowed Items."
2. Student clicks on a completed loan entry.	2. System displays the full loan details, including Start Date, Return Date, Lender/Borrower Name, and any associated rating.
3. Student filters the list by Course Code.	3. System updates the display to show only filtered results.
Alternate course of Action	
Actor's Action	**System's Response**
1. A new user accesses the history page.	1. System displays a message: "Your lending and borrowing history is currently empty."

Identifier	UC-27
Name	Rate/Review User
Summary	Allows a student to provide a rating and optional review for another user following a completed transaction (partnering or lending).
Priority	Medium
Actors	Verified Student, System
Pre Conditions	A loan (UC-24) or partnership (UC-9) has been successfully completed/accepted.
Post Conditions	The user's profile rating is updated.
Typical course of Action	
Actor's Action	**System's Response**
1. Following loan closure, Lender/Borrower receives a prompt to rate the user.	1. System presents a 5-star rating input and a text box for an optional review.
2. User selects 4 stars and enters a review: "Great partner, very responsive."	2. System validates the input.
3. User clicks "Submit Review."	3. System records the rating/review and calculates the new average rating for the reviewed user. 4. System confirms: "Thank you for your feedback."
Alternate course of Action	
Actor's Action	**System's Response**
1. User attempts to submit a review containing blacklisted abusive keywords.	1. System displays an error: "Review violates community guidelines and cannot be submitted."

Communication and extra Features

Identifier	UC-28
Name	Send Direct Message
Summary	Allows students who are partners or involved in an approved loan/handover to communicate securely 1-on-1.
Priority	High
Actors	Verified Student, System
Pre Conditions	Students are linked as partners or are current Lender/Borrower in a non-closed loan.
Post Conditions	Message is delivered and stored in the chat log.
Typical course of Action	
Actor's Action	**System's Response**
1. Student navigates to the Partner's profile or Loan Details and clicks "Message."	1. System opens a private chat interface.
2. Student types a message (e.g., "Where should we meet for the handover?").	2. System captures the message.
3. Student clicks "Send."	3. System delivers the message to the recipient and stores it in the chat database. 4. System sends a real-time notification to the recipient.
Alternate course of Action	
Actor's Action	**System's Response**
1. Student tries to message a non-partner/non-loan-involved user.	1. System displays an error: "You must be study partners or involved in a transaction to start a direct message."

Identifier	UC-29
Name	Receive Automated Notifications
Summary	System sends automatic notifications to users about critical events (requests, deadlines, announcements).
Priority	High
Actors	System, Verified Student
Pre Conditions	A triggering event occurs (e.g., UC-8, UC-21, Loan due date Date).
Post Conditions	User is alerted via in-app notification and/or email.
Typical course of Action	
Actor's Action	**System's Response**
1. Lender approves a Borrow Request (UC-21).	1. System checks the Borrower's notification preferences. 1.2. System generates and pushes an in-app notification: "Your borrow request for [Resource Title] has been approved!"
2. Student clicks the notification.	2. System redirects the student to the relevant page (e.g., Handover Scheduling).
Alternate course of Action	
Actor's Action	**System's Response**
1. The calculated return date is reached, but UC-24 is not executed.	1. System generates a notification for both Lender and Borrower: "Reminder: [Resource Title] is now overdue. Please arrange the return."

Identifier	UC-30
Name	Report Lost & Found
Summary	Allows a student to post or search for lost items or report finding an item on campus.
Priority	Medium
Actors	Verified Student, System
Pre Conditions	Student is logged in.
Post Conditions	A Lost/Found listing is created, or a search result is displayed.
Typical course of Action	
Actor's Action	**System's Response**
1. Student selects "Lost & Found" and then "Report Lost Item."	1. System presents a form for item details, location, and date Date lost.
2. Student enters details (e.g., Red backpack, Lost near Place, Reward: PKR 1000).	2. System creates the listing and tags it as "Lost."
3. Student clicks "Submit."	3. System makes the listing visible in the L&F search. 3.1. System confirms: "Lost item reported."
Alternate course of Action	
Actor's Action	**System's Response**
1. Student searches L&F for "Red backpack."	1. System queries listings by keyword. 2. System displays matching entries, including finder/reporter contact details (if provided).

Administration (Admin Panel)

Identifier	UC-31
Name	Login to Admin Dashboard
Summary	Allows a privileged FAST University Admin/Moderator to access the platform management interface.
Priority	High
Actors	Admin, System
Pre Conditions	Admin user account exists and has "Admin" role assigned.
Post Conditions	Admin is authenticated and granted access to the moderation tools.
Typical course of Action	
Actor's Action	**System's Response**
1. Admin navigates to the admin login URL and enters credentials.	1. System checks credentials and verifies the "Admin" role.
2. Admin clicks "Login."	2. System generates a session token and redirects the Admin to the main dashboard File, showing moderation queues.
Alternate course of Action	
Actor's Action	**System's Response**
1. A Verified Student (non-admin) tries to log in via the admin portal.	1. System authenticates the user but immediately redirects them to the main student dashboard with a message: "Access restricted."

Identifier	UC-32
Name	Manage Users (Block/Unblock accounts)
Summary	Allows an Admin to suspend or reactivate student accounts due to policy violations or for verification issues.
Priority	High
Actors	Admin, System
Pre Conditions	Admin is logged in (UC-31).
Post Conditions	User account status is updated (e.g., from "Verified" to "Blocked").
Typical course of Action	
Actor's Action	**System's Response**
1. Admin navigates to "User Management" and searches for a reported user (Person).	1. System displays the user's profile, status, and a "Block Account" button.
2. Admin reviews the case and clicks "Block Account," providing a reason.	2. System updates the user's status to "Blocked." 2.1 System logs the action and sends an automated email notification to the user about their suspension.
Alternate course of Action	
Actor's Action	**System's Response**
